## THE MAKING OF SCHOOL SPACE

**We have over 10 years experience of working in schools across Lancashire.**

We have spent a lot of time in creating the design for our outdoor learning space. We wanted to manufacture something in our own workshop and deliver it to site ready assembled in order to make it less hassle for the schools. Our aim was to make it modern and eco-friendly and for it to have the ability to be used all year round with minimal heating.

We supplied our first Pod to Lancaster and Morecambe college. This was used as a double classroom and had a sedum roof which included a cedar decking and ramp to match up to the cedar cladding. A second Pod has been supplied to Bleasdale School in Silverdale to be used as an outside classroom.

All pods are designed to be movable and complete with power, insulated and made to last.

We have worked on the design of this for the past year as we wanted to manufacture them in our own workshop and deliver to site to make it less hassle for schools. We also wanted it to look very modern and eco-friendly and be able to be used all year round with minimal heating. Over the summer we had the opportunity to work with Lancaster & Morecambe College to produce our first classroom. This was a double classroom and had a sedum roof which included a cedar decking and ramp to match up with the cedar cladding.

With everything we can offer to the education sector we decided to launch School Space.

We have over 10  
years experience  
of working in  
schools across  
Lancashire

Prices start from as little as £20 per day!

## THE BENEFITS

- Affordable
- Extra teaching space
- No planning permission option
- Hassle-free as manufactured in our own workshop and delivered to site
- U-value of 0.20 so can be used all year round
- Supplied with consumer units with lights and sockets. Just needs connecting to school supply
- Cedar cladding so long product life and attractive to look at
- Aluminium windows and bi-fold doors which enables classroom to be opened up in summer
- Firestone rubber roofing with 20 year membrane warranty
- Supplied fully painted inside and out
- Eco friendly sedum roofs and water butt
- Matching cedar deckings and ramps
- Can be supplied fitted with carpets or vinyl flooring

## SEDUM ROOFS - WHY WE USE SEDUM

**Water Management...** An important feature of urban areas today is the large concrete/tarmac area which prevents drainage. By installing a green roof such as the simple S-Pod system, this helps with retention of water, so preventing excessive run-off which can cause flooding. This water can then be harnessed for irrigation at a later date with water butts etc.

**Habitat Loss...** Buildings and other infrastructures take up space. This means habitat loss. Green roofs become an important replacement for the missing natural habitat both for fauna and flora. Green roofs can act as temporary habitat but also as a replacement habitat for certain species. Bees and butterflies are especially fond of Sedum as are certain species of birds. The green roof can contribute to the increase in various plant and insect/animal species, thus increasing the biodiversity of the local environment.

**Thermal insulation...** A green roof will help to ensure moderate temperature regimes. Warmer in winter and cooler in the summer.

**Sound insulation...** the green roof allows for sound absorption. The overall effect of this is associated with the size and structure of the green roof.

**Visual...** Besides less extreme temperatures, higher humidity and cleaner air, green roofs also provide attractive roofs and a softer roof environment.

**They are pretty to look at!**

## THE BENEFITS

- Bringing fun to school break times
- Designed to improve learning whilst playing
- Can create spaces to help children get the exercise they need
- Making the most of the space available

For more information on how we can create the perfect Play Space for your school please contact us today!

# reading space

## THE BENEFITS

- Designed to make the most out of the space available
- Bespoke to fit the exact size of books to maximise space
- Can create spaces to hide away books or showcase them
- Exciting spaces to encourage children to enjoy reading
- Great for organising books and reading material into categories or sections
- Hundreds of different colours and finishes available

# storage space

## THE BENEFITS

- Designed to make the most out of the space available
- Bespoke to fit around what you need storing, in order to not waste valuable space
- Can create storage to fit areas that isn't otherwise usable space
- Made to measure, so you get exactly what you need
- Hundreds of different colours and finishes available

Made to measure,  
so you get exactly  
what you need
