## MORE ABOUT OUR SCHOOL SPACE

**We have put a lot of time and care into creating the design for our outdoor learning space. We wanted to manufacture something in our own workshop and deliver it to site ready assembled in order to make it less hassle for the schools. Creating minimal disruption to the children the Pods are installed and ready to use within days of being on site.**

Our aim was to make it modern and eco-friendly and for it to have the ability to be used all year round with minimal heating.

All pods are made from cedar clad and are designed to be movable, they are complete with power, insulated and made to last. We can make them to any size or height and have a huge variety of options to add to your space.

Options include bi-folding doors, realistic nature wallpaper, artificial grass indoors or outdoors, lighting and flooring options.

Other options such as a sedum roof, additional windows, skylights, decking, planters and bespoke furniture to fit the space are available. The list is endless with what you would create in your school space.

We have had a lot of success with our learning spaces, creating extra space that encourages children to learn.

For one of our customers, Lancaster and Morecambe College, we created a double classroom complete with a sedum roof. We included a cedar decking and ramp which matched the cedar cladding. Adding the ramp made the space more accessible for pupils.

Bleasdale School in Silverdale also have one of our Pods that is being used as an outside classroom. In addition to the cedar decking the school chose planters to complete their space.

We make the Pods to specified size and have several decking options.

We have over 12 years experience working in schools, retail, hotels and for home owners in the Preston area and further afield. We give a personal friendly service and are fully capable of completing any project. All our work is done to a high standard by our skilled joiners and are manufactured in our workshop.

“We want to create more outdoor classrooms, to encourage children to learn while connecting with the outdoors.”

*Jon Gallagher - Director*

# Prices start from as little as £12,995!

## THE BENEFITS

- Affordable
- Extra teaching space
- No planning permission option
- Hassle-free as manufactured in our own workshop and delivered on site
- U-Value of 0.20 so can be used all year round
- Supplied with consumer units with lights and sockets. Just needs connecting to school supply
- Cedar cladding with a long product life and attractive to look at
- Educational space for outdoor learning
- Aluminium windows and bi-fold doors which enables classroom to be opened up full in the summer
- Firestone rubber roofing with 20 years membrane warranty
- Supplied fully painted inside and out
- Matching cedar decking and ramps available
- Can be supplied with fitted carpets or vinyl woodland flooring

## EXTRAS AVAILABLE

- Sedum roof
- Painting
- Electric upgrades
- Aluminium upgrades
- Carpets
- Seating
- Canvas wallpaper

## SEDUM ROOF - WHY ADD A SEDUM ROOF?

**Water Management...** An important feature of urban areas today is the large concrete/tarmac area which prevents drainage. By installing a green roof such as the simple S-Pod system, this helps with retention of water, so preventing excessive run-off which can cause flooding. This water can then be harnessed for irrigation at a later date with water butts etc.

**Habitat Loss...** Buildings and other infrastructures take up space. This means habitat loss. Green roofs become an important replacement for the missing natural habitat both for fauna and flora. Green roofs can act as temporary habitat but also as a replacement habitat for certain species. Bees and butterflies are especially fond of Sedum as are certain species of birds. The green roof can contribute to the increase in various plant and insect/animal species, thus increasing the biodiversity of the local environment.

**Thermal insulation...** A green roof will help to ensure moderate temperature regimes. Warmer in winter and cooler in the summer.

**Sound insulation...** the green roof allows for sound absorption. The overall effect of this is associated with the size and structure of the green roof.

**Visual...** Besides less extreme temperatures, higher humidity and cleaner air, green roofs also provide attractive roofs and a softer roof environment.

**They are pretty to look at!**

**We have created a mobile classroom that we can take out on the road.**

Our unique mobile space can be positioned virtually anywhere allowing it to be utilised for a variety of different uses such as extra classroom spaces, a pop up shop, outdoor lunch room in the summer, or even a Santa's grotto at Christmas.

It really is a universal, mobile space that can be used for almost any idea you may have. We created our mobile space so that you can trial it at your school and get the full experience.

If you are thinking of hiring our mobile space please contact us with your details.
